PROJECTS

Jupiter — Neo Bank

Designing and developing chat and Debit card management in React Native for both iOS and Android. App is under development and not available to the public. For more info log on to jupiter.money

Bullet — UPI Based Credit App

Designing and developing mobile app in Flutter. (Android|[iOS](iOS))

Itilite — Business Travel Management App

Architecting, designing and developing mobile app in React Native for Business Travel Management.. (Android|[iOS](iOS))

VRDevotee — Immerse in God & Spirituality in VR

Developed a 2D version of the VRDevotee app in React Native and Unity for both iOS and Android. The app allows users to watch spiritual videos in 2D, 360 & VR . (Android|[iOS](iOS))
Also created an Android TV app for the same using Leanback Library.

Sri Sai Spiritual Center — App for Sri Sai Temples

Created a native Android app and an iOS app using React Native. Was involved in full development and deployment of the apps. (Android|[iOS](iOS))

VRDevotee Kiosk — *Helps to Play Videos in VR Headset*

Created a native Android app which helps to play videos in VR headset over bluetooth. User can control the video inside the headset using this app. App is not public in playstore.

mPassBook — *Mobile Passbook*

Worked as Team Lead for this project. Was part of the full development life cycle. Used Sync Adapter, Content Providers for real time data syncing. Delivered to multiple banks ([BOB](BOB)|IDBI|Federal).

SpaceWoot — *Social networking app*

This is a social networking app for building and discovering communities. User can create board and start chatting with other members. Mainly used socket technology for communications. The project is scrapped and not available in stores anymore.
